Re: AP3 Assessment

Dear Parent/Carer,

I am writing to inform you that your son/daughter will be completing their final science assessment of the year during the week beginning Monday 19th June. We place great importance on the assessment and the results will be used to formulate the sets for next year's science groups as the pupils enter year 9.

Class teachers have already informed pupils of the assessment and the content they need to revise but I have included it below for your information so you can support your son/daughter better in preparing.

I would also like to bring to your attention a Microsoft Teams group where pupils can find resources to assist them in their preparation. Your child has received an email to their school account with a link to click on to access Microsoft Teams. Pupils can use their school login details to log into Microsoft Teams and in the Year 8 Science revision group they will find links to purchase a revision guide, links to educational websites, topic maps, knowledge summaries and sample tests with mark schemes for pupils to practice.

Topics included in the assessment are:

Autumn term:

- Combustion
- Sound
- Food and digestion
- Unicellular organisms

Spring term:

- Breathing and respiration
- The Periodic table
- Metals and their uses
- Current electricity

Thank you for your continued support.

Kind regards

Chris Page
