TIBSHELF COMMUNITY SCHOOL

ADMINISTRATION OF MEDICINES

Ratified: Oct 2026
(DCC Policy)

Introduction

It is the policy of Tibshelf Community School to support pupils who require medication during the school day, where this is necessary to enable them to attend school and participate fully in education. This applies to prescribed and non-prescription medicines accepted in accordance with this policy. This is in line with:

- Section 100 of the Children and Families Act 2014
- The Department for Education's statutory guidance, *Supporting pupils at school with medical conditions*
- The school's separate Allergy Safety Policy
- Children's Wellbeing and Schools Act 2026, including the statutory requirements relating to allergy safety

Where a pupil is not well enough to attend school, they should remain at home and should not be sent into school solely so that medication can be administered.

The school understands that administering medicines is a purely voluntary activity except where the responsibility forms part of an employee's contractual duties or job description and will not force, pressure or expect staff to undertake this activity.

The school will only accept medicines in their original container accompanied by a fully completed parental consent form. It is a parent's/carer's responsibility to supply medicines that are within their expiry date and to collect and dispose of any unused medicines.

This policy is to be utilised in conjunction with the Local Authority's guidance "The Administration of medicines and associated complex health procedures for Children's Services in Derbyshire".

Roles and Responsibilities

Governing Body

1) To support the Headteacher and staff in delivering this policy and to make any necessary resources available to enable them to do so.

2) To ensure that the key elements relating to parents'/carers' responsibilities are published and communicated to parents/carers in a suitable manner e.g., , school's website, newsletters.

3) To ensure suitable facilities for the administration of medicines are provided.

Headteacher

1) To review this policy at least annually and following any significant incident, legislative change or revision to Local Authority guidance.

2) To be responsible for the day-to-day implementation of this policy in school.

3) To ensure any staff who volunteer to administer medicines are competent and fully familiar with their responsibilities.

4) To ensure staff volunteering to administer medicines receive suitable training where necessary and that this is kept up to date.

5) To ensure suitable arrangements are made for supply, temporary and agency staff

6) To ensure appropriate arrangements are in place for educational visits and off-site activities

7) To ensure medicine errors, incidents and near misses are recorded, reported and reviewed

8) To ensure sufficient appropriately trained staff are available, including reasonable cover arrangements

9) To monitor the administration of medicines and records relating to the administration of medicines are maintained in accordance with this policy.

10) To report to the Governing Body any issues that arise out of the implementation of this policy.

11) To ensure the policy is applied equitably and fully throughout the school.

12) To ensure any disputes regarding the application of this policy are resolved.

13) To ensure where staff support is required medicines are only administered where permission on the appropriate form has been obtained.

Staff Volunteering to Administer Medication

1) To ensure they are competent (and where necessary trained) and confident to undertake the administration of the medicine.

2) To fully check before administering any medication that it is the correct medication for the correct pupil and is being administered in line with the instructions on the label and the parental consent form.

3) To record all medicines administered on the correct recording form.

4) To immediately bring to the attention of the Headteacher any mistakes made in the administration of any medicine.

5) To ensure any training undertaken is refreshed, as necessary.

6) To understand the relevant reporting and line-management arrangements, including who to contact for advice or in an emergency.

Arrangements for Administering Medication at Tibshelf Community School

Receipt of Medication

No medicines (prescribed or non-prescription) will be allowed into school unless accompanied by a fully completed consent form completed by a parent or carer a copy of which is located at Appendix 1.

(NB for secondary schools this form can be completed by the pupil if they have been deemed to have sufficient comprehension and intelligence to be legally competent to make decisions about their own health care. In appropriate circumstances, a pupil may complete the consent form themselves where they are considered competent to make decisions about their own healthcare. This will be considered individually, taking account of the pupil's age, maturity and understanding, the nature of the treatment, and advice from parents/carers and relevant healthcare professionals).

The form and the medicines should be brought to the Medical Room and handed over to the Medical Welfare Officer.

Medicines will only be accepted in their original container with the dispensing label clearly stating as a minimum the name of the young person, the name of the dispensing pharmacy, date of dispensing, name of medicine, amount of medicine dispensed and strength, the dose and how often to take it and if necessary, any cautions or warning messages. Non-prescription medicines should be in their original bottle/containers clearly labelled with the young person's name.

Where practicable, only the quantity of medicine required during the school day should be supplied. For long-term medication, the school may agree with the parent/carer to store a reasonable quantity to avoid unnecessary transportation between home and school. Medication must remain within its expiry date for the agreed period. Parents/carers are responsible for collecting and safely disposing of excess or expired medication.

Staff will ensure that they check the information on the prescription label matches the information on the parental consent form. As prescription labels may have vague directions for administration such as "as directed" or "as before," unless there are clear directions on the parental consent form the medicine will be rejected and will not be stored or administered in the school until there are clear directions.

Any medicines not provided in the original containers, appropriately labelled and with a fully completed parental consent form will not be administered. In the event that the school decides not to administer the medicine the parent/carer will be informed immediately so they can make alternative arrangements for the medicine to be administered.

Staff and parents/carer should check and agree the quantity of medicine provided and this should be recorded on the Medicines Administration Record (MAR) sheet Appendix 2 and signed by both the staff member and parent/carer.

The school will ensure parents are made aware of the above requirements at the start of each year and are reminded of them periodically via school's communication methods.

The school on receipt of the medication and completed parental consent form will ensure a suitable medication administration record (MAR) form located at Appendix 2 is completed for the pupil and medication. Two members of staff will check the MAR form when it is set up to ensure that the information transferred onto it is accurate and complete.

Storage of Medication

Medicines will be stored as follows:

Medicines which are **not** "rescue medicines required immediately in an emergency" such as antibiotics, pain relief, etc will be stored in a locked cupboard in the Medical Room.

Medicines requiring refrigeration will be stored in a labelled container within a fridge only accessible to staff in the Medical Room. Where this is a long-term medication, the fridge will be regularly defrosted, cleaned and the temperatures will be checked and recorded daily.

Emergency or rescue medication is that which is required immediately in an emergency situation such as asthma inhalers or adrenaline auto-injectors. These need to be readily available to pupils as and when they are required.

Where a pupil is considered competent to carry and administer their own rescue medication the school will encourage and support them to do so.

Where pupils are not deemed to have sufficient competence and ability to store and administer their own rescue medication the school will ensure that it is stored so that it is readily accessible in an emergency but is only available for the child it has been prescribed for.

Arrangements will ensure that emergency medication remains immediately accessible to authorised staff during lessons, examinations, break and lunchtime, PE and sporting activities, educational visits, and before- and after-school activities.

Suitable arrangements will be in place to ensure these emergency medications are readily available during break/lunch times and other activities away from the classroom.

NB All medications will be stored in their original labelled/named containers irrespective of where they are stored.

Storage and Administration of Controlled Drugs

There are certain legislative requirements concerning controlled drugs. As such there is a separate section on these at Appendix 3 of this policy which will be followed should any medication designated as a controlled drug be required in school.

Administration of Medicines

There are three levels of administration of medicines in schools:

A. The child self-administers their own medicine of which the school/service is aware.
B. The child self-administers the medication under supervision.
C. A named and trained consenting staff member administers the medicine.

(Further details on each of the above can be found on pages 37-41 of the overarching guidance document "The Administration of Medicines and Associated Complex Health Procedures for Children Advice & Guidance for Children's Services in Derbyshire")

Administering medications is a purely voluntary activity (unless specified as part of a staff member's job description). Therefore, participation in the administration of medication is on a voluntary basis and staff cannot be compelled to administer medicines unless they have accepted job descriptions that include duties in relation to the administration of medicines. The school will encourage staff to become involved where necessary so that pupils' access to education is not disrupted. However:

- Individual decisions on involvement will be respected.
- Punitive action will not be taken against those who choose not to consent

In this school medicines will only be administered by staff in line with the Administration of medicines and associated complex health procedures for Children's Services in Derbyshire."

All staff who administer medications will receive sufficient information, instruction, and where necessary training to undertake this task. Training from a health professional will always be required for invasive procedures requiring a specialised technique. Examples include (but are not limited to) diabetes, epilepsy, gastrostomy, and rectal medication.

For most routine administration of medicines, knowledge of this policy and the guidance contained within it will be sufficient as staff will not be expected to do more than a parent/carer who gives medication to a child.

Where a child has complex health needs and an Individual Healthcare Plan and requires specific or rescue medication the staff administering the medication will have detailed knowledge of the Individual Healthcare Plan and will have received suitable training from health professionals to undertake the administration of the medicine. This training will be refreshed annually or as required should there be any significant changes to the medicine or administration procedure.

For all administration of medicines, the following procedures will be adopted:

1. Wherever possible, two staff will be involved in the process to ensure that the correct dose of the correct medicine is given to the correct child and once the medicine has been administered both will sign the Medicines Administration Record (MAR) sheet (NB for controlled drugs there **must** be 2 people in attendance)

2. Before the medicine is given each time, staff will ensure they have checked the following.

Right Person	Is this the right person for this medicine?
Right Medicine	Is it the correct medicine? Do the label instructions match up with the instructions on the written consent? Is the name the same?
Right Dose	Does the label state the same as the instructions? Remember to check not just the amount e.g., 5mL or 10mL but also the correct concentration e.g., 125mg/5mL
Right Time	Are you sure it is 12 noon that this medicine should be given? Where can you check?
Right Route	Does the route of administration match the dispensing label, consent form and, where applicable, the pupil's Individual Healthcare Plan?
Right Date	Ensure the medication has not expired. Always check on the label for instructions that may relate to this e.g. Do not use after 7 days. Always check the documentation to confirm that it has not already been given.

3. Medication will only be given to one pupil at a time and the MAR sheet will be completed before any medication is given to the next pupil.

4. Only the medication for that pupil will be taken out of the storage and this will be returned to storage before starting the process for the next pupil.

   If there is any doubt about whether medication should be administered, it will not be given unless withholding it would conflict with an emergency healthcare plan. Further advice will be sought immediately from an appropriate healthcare professional and/or the pupil's parent/carer. The decision and advice received will be recorded and reported to the relevant line manager. In a medical emergency, staff must call 999.

5. If a pupil refuses to take their medication or it is suspected that they have not taken a full dose staff will record this on the MAR sheet and immediately seek advice from health professionals and/or parents/carers. This should also be reported to their line manager. They should not attempt to give another dose or try and force the pupils to take another dose.

Changes to Medication

The school will not change the dose of a prescribed medication without written authorisation from a health professional.

Non-Prescription Medicines

The school will accept non-prescription medications.

Non-prescription medicines must be supplied by parents/carers in their original containers labelled with the pupil's name. They must be in date for the duration that they are required for and must be accompanied by the fully completed parental consent form. Parents must also inform the school each day of what dose has been given to the pupil that day to avoid accidental overdosing. Where the school administers non-prescription medicine, the parent/carer will be informed in writing of the dose and time given.

The school will not keep a stock of non-prescription medication to give pupils.

The school will not administer aspirin, or any medicine containing aspirin, to a pupil under 16 unless it has been prescribed by a doctor.

Complex Health Needs

Pupils with complex health needs will have an Individual Healthcare Plan. This will specify exactly how and when medicines should be administered and what training is required. The school will follow Derbyshire County Council's guidance, "Administration of Medicines and Associated Complex Health Procedures for Children's Services in Derbyshire" guidance and will also comply with the codes of practice relating to specific individual medical conditions contained within their document. A list of these specific codes of practice is contained at Appendix 4.

Arrangements for pupils with allergies and at risk of anaphylaxis are set out in the school's separate Allergy Safety Policy.

Specialist Training

Many of the conditions indicated in the previous section require that staff undertake specific training to be able to administer the ~~mediation~~ medication in line with the pupil's Individual Healthcare Plan.

There are also specific medical practices which require insurance approval before they can be undertaken by school staff, the table at Appendix 5 gives details of these.

Appendix 1

Parental Consent for School to Administer Medicine

The school will not administer medicine to your child unless this form has been completed and signed, the medicine has been accepted in accordance with the school's policy, and an appropriately trained and authorised member of staff is available.

Note: Medicines must be in the original container as dispensed by the pharmacy

Appendix 3 Controlled Drugs

The supply, possession and administration of some medicines are controlled by the Misuse of Drugs Act 1971 and its associated regulations. Some may be prescribed as medication for use by children. Controlled drugs likely to be prescribed to children which may need to be administered in school are, for example, methylphenidate and dexamfetamine for ADHD or possibly morphine/fentanyl for pain relief.

There are legal requirements for the storage, administration, records, and disposal of controlled drugs. These are set out in the Misuse of Drugs Act Regulations 2001, as amended. They do not apply when a person looks after and takes their own medicines.

Any trained member of staff may administer a controlled drug to the pupil for whom it has been prescribed. Staff volunteering to administer medicine should do so in accordance with the prescriber's instructions and these guidelines.

- A child who has been prescribed a controlled drug may legally have it in their possession to bring to school/setting.
- Once the controlled drug comes into school (in accordance with previous instructions on receipt of medication) it should be stored securely in a locked container within a locked cabinet to which only named staff should have access.
    - A record of the number of tablets/doses received should be kept for audit and safety purposes.
- When administering a controlled drug, two people will be present - unless it has been agreed that the child may administer the drugs him or herself.
- The administration of **controlled drugs requires two members of staff (unless it has been agreed that the pupil may self-administer)**. One should administer the drug, the other witness the administration. Both should complete the administration record.
- In some circumstances a non-controlled drug should also be treated in the same way where a higher standard is considered necessary. For example, the administration of rectal diazepam or buccal midazolam – these may be requirements imposed by insurers as a condition of cover.
- On each occasion the drug is administered, the remaining balance of the drug should be checked and recorded by the person(s) administering the drugs.
- A controlled drug, as with all medicines, will be safely disposed of by returning it directly to the parent/carer when no longer required to arrange for safe disposal.
- If this is not possible, it should be returned to the dispensing pharmacist (details should be on the label).
- Misuse of a controlled drug, such as passing it to another child for use, is an offence and will be dealt with through the school's disciplinary process and police involved where appropriate.
- The school will minimise the storage of controlled drugs on site whilst understanding the need to avoid constantly having to receive and log controlled drugs on a daily basis. The school will hold only a reasonable quantity of a controlled drug, agreed with the parent/carer and based on the pupil's needs.

Lone working

In exceptional circumstances if it is not possible to ensure that two staff are available to comply with the requirements of this policy and strict adherence could lead to a child being denied access to education or the safety of the child or staff being compromised. The school will look to put in place suitable arrangements to ensure the child's medicine can be given. These will be discussed and agreed by the Headteacher and Governing Body and will be written down. They should be agreed by carers and the staff agreeing to undertake the administration.

If staff are concerned that a medicine that is not a controlled drug should be managed in the same way, it can be treated as a controlled drug.

Off-site and in the Community

This will cover a range of circumstances for which appropriate arrangements will need to be made. They will cover, for example, a range from a short off-site 1:1 activity to a longer, perhaps overnight, activity with a group of young people. The minimum requirements are:

- there must be a named person responsible for safe storage and administration of the medicine.
- a second person will witness the administration.
- during short-duration or day visits off site if the controlled drug is required to be administered the named person should carry the medicine with them at all times and a lockable/portable device such as a cash box will be used to prevent ready access by an unauthorised person.
- only the amount of medicine needed whilst off-site should be taken – it should be stored in a duplicate bottle which can be requested from the pharmacist and must have a duplicate of the original dispensing label on it.
- the controlled drugs register may also be taken where that is appropriate (e.g., a long absence where the register is not required elsewhere in respect of another young person); alternatively, a record kept, and the register updated on return to base.
- For residential visits on arrival the controlled drug will be transferred from its portable storage and be stored in accordance with the guidance for storage in school wherever possible.
- School staff must not transfer medicines themselves into an unlabelled or alternative container. Any duplicate container and dispensing label should be provided by the dispensing pharmacy.
- Medication arrangements must be included in the educational visit risk assessment.

THE CONTROLLED DRUGS REGISTER – SPECIFIC REQUIREMENTS FOR SAFE STORAGE & ADMINISTRATION OF CONTROLLED DRUGS

Storage:

- The controlled drug must be stored in a lockable cupboard/cabinet – *this may be the safe cupboard used for all medicines, in which case there should be a separate, labelled container for the drugs and this register.*
- Staff responsible for the administration of the controlled drug must be aware of its location and have access.
- The controlled drug must only be given by a member of staff who has received instruction in its administration.
- The dosage must be witnessed by a second member of staff.
- Any discrepancies must be reported and investigated immediately.

NB – Emergency medicines
Where a drug that is either a controlled drug or one that should be subject to the standards for controlled drugs and is designed for emergency use (Buccal Midazolam, for example), the need for ready access overrides the general requirements in relation to safe storage. It will still be stored securely and not in a way where pupils could access it.

Recording:

The receipt, administration and disposal of controlled drugs will be recorded in a book intended for that purpose. It will be bound and with numbered pages.

- A separate sheet is to be maintained for each child, for each controlled drug that is stored and for each strength of the drug.
- The prescriber's instructions and any additional guidelines will be followed.
- The controlled drug register replaces the MAR sheet for *the specific drug only* – the health and medicine information sheet will also be completed.
- ***Entries must never be erased or deleted, and pages must never be removed.***
- If a recording error is made, a record to that effect will be entered on that page, countersigned with a statement "go to page…"
- Where an entry is made in error, it must remain legible. A single line should be drawn through the incorrect entry and the correction entered, dated, signed and witnessed.
- If it is an administration error, the Code of Practice 8 in the Children's Services guidance will be followed.

The controlled drugs register must record, as a minimum, the information shown in the templates below.

CONTROLLED DRUG REGISTER FORMAT PART 1				
NAME OF CHILD				
MEDICINE RECEIVED				
Name of medicine received:

1. Allergy/Anaphylaxis
2. Attention Deficit Disorder/Attention Deficit Hyperactivity Disorder (ADD/ADHD) in school and other settings.
3. Asthma
4. The asthma attack: what to do.
5. Children with Diabetes requiring insulin.
6. Continence management and the use of Clean Intermittent Catheterisation (CIBC)
7. Epilepsy - Treatment of Prolonged Seizures
8. Action to be taken if a medicine administration error is identified.
9. Controlled Drugs
10. Disposal of Medicines
11. Safe handling and storage of medical gas cylinders
12. Non-prescribed medicines/medicinal products
13. First Aid

Appendix 5

The following information is subject to regular review. The most current version is maintained in the electronic version on the Derbyshire County Council Intranet/Extranet:
Procedures can only be performed where parental permission has been given, staff are following written guidelines, have been trained and been judged to be competent to carry out a procedure.
For advice on whether or not a procedure can be performed or for approval to be sought email the requirements to: HealthandSafetyCAYA@derbyshire.gov.uk

TASK/PROCEDURE	Confirmation of insurance required from Risk and Insurance Manager before commencement	INSURER or INDEMNITY CONDITIONS
Anal Plugs	**Yes**	
Apnoea monitoring	**No**	Covered for monitoring via a machine following written guidelines. There is NO cover available in respect of visual monitoring
Bladder washout	**Yes**	
Blood samples	**No**	Covered - but only by Glucometer following written guidelines
Buccal midazolam by mouth	**No**	Covered - following written guidelines
Bursting blisters	**Yes**	
Catheters (urinary) including mitrofanoff - clean/change of bag	**No**	Covered - following written guidelines for the changing of bags and the cleaning of tubes. There is no cover available for the insertion of tubes.

Catheters (urinary) including mitrofanoff - insertion of tube	**Yes**	
Chest drainage exercise	**No**	To be undertaken by competent staff in line with a care plan
Colostomy/ileostomy/vesicostomy Stoma care - change of bag & cleaning	**No**	Covered - following written guidelines in respect of both cleaning and changing of bags
TASK/PROCEDURE	**Confirmation of insurance required from Risk and Insurance Manager before commencement**	**INSURER or INDEMNITY CONDITIONS**
Defibrillators/First Aid only	**No**	Covered - following written instructions and appropriate documented training.
Dressing Care - Application & replacement	**No**	Covered - following written health care plan for both application and replacement of dressings
Ear/Nose drops	**No**	Covered - following written guidelines
Eye care/ Eye Drops	**No**	Covered - following written guidelines for persons unable to close eyes
Gastrostomy & Jejunostomy care • General Care • Administration of medicine • Bolus or continuous pump feed	**No**	Covered - in respect of feeding and cleaning following written guidelines but no cover available for tube insertion unless maintenance of Stoma in an emergency situation.

Gastrostomy & Jejunostomy tube - insertion/reinsertion	**Yes**	Covered - in respect of feeding and cleaning following written guidelines but no cover available for tube insertion unless maintenance of Stoma in an emergency situation.
Hearing aids - Checking, fitting and replacement	**No**	Covered for assistance in fitting/replacement of hearing aids, following written guidelines
Inhalers, and nebulisers	**No**	Covered - following written guidelines for both mechanical and handheld
Injections - pre-packed doses. (Includes adrenaline auto-injectors & dial-up diabetic insulin pens).	**No**	Covered but only for the administering of pre-packaged dosage using pre-assembled pen on a regular basis pre-prescribed by a medical practitioner and written guidelines
Injections - non-pre-measured doses	**Yes**	
Injections - intramuscular and sub-cutaneous injections involving assembling syringe	**Yes**	

TASK/PROCEDURE	**Confirmation of insurance required from Risk and Insurance Manager before commencement**	**INSURER or INDEMNITY CONDITIONS**
Manual Evacuation	**No**	To be undertaken by competent staff in line with a care plan

Mouth toilet	**No**	Covered
Naso-gastric/jejunal tube feeding	**No**	Covered - following written guidelines but cover is only available for feeding and cleaning of the tube. There is no cover available for tube insertion which should be carried out by a medical practitioner
Naso-gastric/jejunal tube - reinsertion	**Yes**	
Oral prescribed medication	**No**	Covered subject to being pre-prescribed by a medical practitioner and written guidelines. Where this involves children, wherever possible Parents/Carers should provide the medication prior to the child leaving home. A written consent form will be required from Parent/Carer, and this should be in accordance with LA procedure on medicines in schools etc.
Oxygen administration - assistance	**No**	Covered but only in the respect of assisting user following written guidelines, i.e., applying a mask or nasal cannula
Oxygen and care of liquid oxygen administration including filling of portable cylinder from main tank	**No**	All covered subject to adequate training except filling of portable cylinder from main tank as subject to HSE guidelines.
Pessaries	**Yes**	
Pressure area care (bed sores etc)	**No**	To be undertaken by competent staff in line with a care plan
Pressure bandages	**No**	Covered - following written guidelines.
Physiotherapy	**Yes**	Refers to physiotherapy provided by a professional physiotherapist or the drawing up of a treatment programme. Physiotherapy undertaken by trained volunteers carrying out prescribed exercises is allowed.

TASK/PROCEDURE	**Confirmation of insurance required from Risk and Insurance Manager before**	**INSURER or INDEMNITY CONDITIONS**

	commencement	
Rectal administration generally e.g., morphine	**Yes**	
Rectal midazolam in pre-packaged dose	**No**	Covered - following written guidelines and two members of staff must be present.
Rectal diazepam in pre-packaged dose	**No**	Covered - following written guidelines and two members of staff must be present.
Rectal Paraldehyde	**Yes**	
Stoma care	**No**	Including maintenance of patency of stoma in an emergency
Suction Machine - Yankauer suction device	**Yes**	
Suppositories	**Yes**	Applies to suppositories other than pre-packed midazolam or diazepam (which are shown separately)
Syringe drivers - programming	**Yes**	
Swabs - External	**No**	Covered - following written guidelines.
Swabs - Internal	**Yes**	No - other than oral following written guidelines.
Topical Medication	**No**	To be undertaken by competent staff in line with a care plan
Tracheostomy - clean external	**No**	Cover is only available for cleaning around the edges of the tube following written guidelines.
Tracheostomy - removal and re-insertion	**Yes**	
Vagas nerve stimulator	**No**	As long as written care plan is in place.
Ventilators	**Yes**	Covered - following written guidelines.
